

“System” as an Adverb: Systematically

There are three ways of doing anything

- Randomly → Religion → Pray

You don't know how to do it.
You don't care how it is done.
You do it in different ways at different times.
Different people do it in different ways.

- Intuitively → Art → Practice

You know how to do it as evidenced by your performance, but you can't formulate the rules involved.
You cannot teach it to others.
You *know* more than you can *tell*.

- Systematically → Science → Discover

You can articulate the steps in the process so explicitly that another entity, following your instructions, can do it and produce identical results.

Another entity: Person → Delegation
Another entity: Machine → Automation

Systematic = Structured = Rule-Based = Programmed = Algorithmic
